

Financial Assistance Program Summary

Our Financial Assistance Program helps patients get emergency and/or medically necessary care. It does this by giving eligible patients a discount on their bill.

What is the Financial Assistance Program?

- We give you a discount (between 100% and 50%) on emergency and/or medically necessary care.
- If you don't have insurance, the discount is from what we bill people with insurance, on average (AGB).
- If you have insurance, the discount is on the amount of the bill that insurance doesn't pay.

Who can get the Financial Assistance Program Discount?

- Your income must be below the income limits below. If your income is over the income limit, you can still get help if your bill is more than 20% of your household income. If you get help due to this, your bill may be reduced to 20% of your household's income.
- Your savings must be below the resource limits. Your house and car do NOT count as resources. Cash, savings, stocks or bonds do count as resources.
