

American College of Radiology

**The gold standard
in imaging accreditation**

**ACR delivers medical imaging accreditation
from medical imaging experts.**

ACR Imaging Accreditation

It's the right thing to do

American College of Radiology (ACR) accreditation is a peer-reviewed, educationally focused evaluation process to help you assure your patients of the highest level of image quality and safety. It documents that your facility meets accreditation requirements for equipment, continuing education and personnel. Clinical and phantom image quality review as well as radiation dose assessments are critical elements of accreditation.

Successful accreditation is a clear differentiator for your imaging services and demonstrates your commitment to delivering quality patient care.

Accreditation of your site is not only the right thing to do, it also helps your facility meet governmental and third-party payer criteria.

ACR — It's the one resource you need

ACR has dedicated imaging experts and resource tools at your fingertips to take the guesswork out of applying for accreditation.

Our easy-to-access online resources serve as a comprehensive guide to the program requirements for each program. Your facility is also provided convenient, web-based access to your facility's personalized accreditation information.

The ACR understands your business needs — imaging accreditation accomplished by imaging experts with nearly 25 years of experience and timely, successful accreditation of more than 28,000 modalities at facilities nationally and internationally.

Our team of imaging experts knows that accreditation represents your commitment to quality patient care to your customers and your community.

By displaying the ACR gold seal(s), you will strengthen consumer confidence that you are delivering quality imaging services they can trust.

Stay competitive — Display your ACR gold seals in all imaging and therapy modalities

ACR medical imaging experts provide image review and constructive feedback on staff qualifications, equipment, quality control, quality assurance, safety policies, image quality and dose for the ACR accreditation programs below.

Breast MRI*

Breast Ultrasound

1-800-227-6440 | breastultrasound-accred@acr.org

Computed Tomography*

1-800-770-0145 | CTaccred@acr.org

Magnetic Resonance Imaging*

1-800-770-0145 | MRI@acr.org

Ultrasound

1-800-770-0145 | ultrasound-accred@acr.org

Mammography

1-800-227-6440 | mamm-accred@acr.org

Stereotactic Breast Biopsy

1-800-227-6440 | stereo-accred@acr.org

Nuclear Medicine and PET*

1-800-770-0145 | nmap@acr.org

ACR-ASTRO Radiation Oncology

1-800-227-6440 | rad-onc-accred@acr.org

* CMS has selected the ACR as a designated accrediting organization for outpatient medical imaging facilities, able to satisfy all accreditation requirements for providers of advanced diagnostic imaging services (ADIS) mandated by the Medicare Improvements for Patients and Providers Act of 2008. The ACR helps providers comply with the CMS requirement that all providers of CT, MRI, PET and nuclear medicine exams who bill for the technical component under the physician fee schedule be accredited by Jan. 1, 2012, in order to be reimbursed by Medicare for these services.

Choose the Gold Standard in Imaging. Choose ACR.

Demonstrate your commitment to the highest levels of quality and safety with accreditation through the ACR. Start today to help your imaging team reinforce its reputation for quality care in your community. ***It's the right thing to do.***

Gain the ACR advantage:

- Easy, online application and renewal
- Multisite, multimodality pricing
- Designed by radiologists and medical physicists
- Peer-reviewed, educationally focused
- Unmatched imaging review by radiologists and medical physicists
- Guided by expert technologists

ACR experts are standing by to guide you every step of the way.
